

Overview

Coláiste Muire recognises that technology and Internet resources offer a wide variety of educational opportunities and tools that can enhance learning. G Suite for Education is one of the important tools utilised by teachers and students to help students succeed.

G Suite for Education has been deployed at Coláiste Muire and will be used for the day to day management and in the classroom integrated into the teaching and learning experience. We are very excited about the possibilities that G Suite offers students and teachers in the classroom as we strive to provide our students with 21st Century skills.

Coláiste Muire's G Suite for Education domain is different from a personal Google account and is NOT open to the public. It is a safe and secure "self-contained" cloud-based system that is unique to our domain.

The following Google services may be available to each student and hosted by Google as part of Coláiste Muire's G Suite for Education implementation:

- Gmail: A private email address that can only be used to send and receive email to and from
- members of the school domain.
- Drive: A secure online space where students will store all of their digital work.
- Google Docs: Docs, Sheets, Slides, Drawings. Anywhere that students have access to the internet, they can access their work. Students will be able to work on projects at school and at home. Applications in Google Drive can be shared for collaboration with other members of the school domain.
- Calendar: An individual calendar providing the ability to organize schedules, daily activities, and assignments.
- Classroom: Classroom is designed to help teachers create and collect assignments paperlessly
- Other Selected Apps: Selected apps will be available to students when requested by teachers and when safe and appropriate.
